The New KODAK PROFESSIONAL ML-500 Digital Photo Print System

Speed where you need it.

The revolutionary new KODAK PROFESSIONAL ML-500 Digital Photo Print System can deliver high-speed, on-demand printing wherever it's needed. In your studio or lab workflow; on location at a theme park, mall, school or corporate event; or for distributed, on-demand output—the ML-500's incredible speed will open up one window of opportunity after another.

Imagine getting a photo-quality, 8 x 10 dry thermal print in just 13 seconds. With the burst rate you need, when you need it. Immediate, high-quality results can mean more sales, more customer satisfaction. And more repeat business.

The ML-500 is four to six times faster than other dye-sublimation or inkjet printers—and as productive as many digital mini-labs. With output like this, you'll get more high-quality jobs done every hour.

Best of all, the ML-500 combines this high performance, go-anywhere versatility, and simple operation with a breakthrough price. And, as it helps you reduce the complexity of your workflow, it also cuts your operating costs. In fact, at less than \$1 per 8 x 10 print, the ML-500's media costs are about half those of other thermal and inkjet devices.

With the KODAK PROFESSIONAL ML-500 Digital Photo Print System you can put more speed where you need it and reap all these benefits:

- **Fast turnaround:** Photo-quality, 8 x 10 dry thermal prints in 13 seconds. With the burst rate you need, when you need it.
- **High throughput:** Blazing print speeds (up to 270 8 x 10's per hour) let you get more jobs done every hour.
- **Customer satisfaction:** Immediacy and high-quality results will have your customers coming back for more.
- **Versatility:** Goes where you need it—on location or as an adjunct to your current workflow in a studio or lab operation.
- **Value:** Speed, simplicity, and high-quality results at a remarkably affordable price.

Kodak Professional

The KODAK PROFESSIONAL ML-500 Digital Photo Print System

- Get photo-quality prints in just 13 seconds; 270 8 x 10's per hour.
- Plugs into your workflow, whatever your application—in the studio, lab or on location.
- Its compact design and completely dry thermal system make it easy to transport.
- Delivers professional, photo-quality prints at half the cost of other thermal and inkjet devices.
- Modest capital investment; low media cost per print (under \$1 per 8 x 10 inch print).
- Prints all standard print sizes up to 8 x 10 inch. Capable of printing 8 1/2-inch-wide borderless prints up to 500 ft. long.
- Can be operated non-stop and unattended for over two hours.

Printer Specifications*

- Printing process: Multi-head thermal dye-sublimation
- Print quality: Continuous tone, 300 dpi, 16.7 million colors
- Print time: 13 seconds per 8 x 10 inch image
- Computer interface: IEEE 1394 (FireWire)
- Printer drivers for WINDOWS 98/SE, 98/ME, WINDOWS NT 4.0, 2000, and WINDOWS XP Systems. MAC OS X printer driver available Q3 2002

Media

- Surface (lamine) options: Gloss, Matte
- Paper width: 8.5 inch (216 mm)
- Paper roll weight: 13 lbs. (5.9 kg)
- Paper and ribbon length: 500 ft. (152.4 m)
- In-line lamination: KODAK PROFESSIONAL EKTATHERM XTRALIFE Laminate for water/fingerprint resistance and greater durability

Printer Server: Minimum System Requirements

- WINDOWS 2000 or WINDOWS XP with a 1 GHz processor
- 512 MB RAM
- 10 GB available storage on hard drive
- Dedicated slot for PCI format IEEE 1394 (FireWire) interface card and cable (included)

Physical Characteristics

- Physical dimensions (W x H x D): 17" x 22" x 26" (432 mm x 559 mm x 660 mm)
- Weight: 120 lbs. (54.5 kg)
- Plugs into standard wall outlets (110-240 VAC)
- No other connections, plumbing or HVAC investments required

Warranty and Support

- One-year on-site service including parts and labor
- Extended warranty programs available
- Self-service training and authorization program available
- Toll-free help desk support
